SPRING OF 1862.

PRINCE & CO. LINNÆAN GARDENS & NURSERIES,

(Founded 1732) Flushing, Long Island, N. Y.

CATALOGUE OF STRAWBERRIES.

FORTY-SEVENTH EDITION.

☞All orders are labeled and packed in a superior manner. Strawberry Roots can be sent safely at any season if properly packed Parcels can be sent by Mail, if desired, at 16 cts. pr. lb. If purchasers do not specify, we send by Express.

No less than a dozen are sold of any variety, unless otherwise stated in the Catalogue. Persons ordering will please specify the Edition of the Catalogue.

Terms. Cash with the order, or collected by Express, on delivery.

☞ *Wholesale Prices.* By the 1000, or 10 000, the prices for standard Market Varieties will be $ 4, to $ 5 pr. 1000.

☞Our Catalogues of Fruit and Ornamental Trees, Shrubs, Plants, Grapes, Bulbous Roots, Green House Plants &c., will be sent to applicants who inclose stamps.

The varieties embraced in our entire collection of Strawberries, including the Newest Foreign Varieties, are fully described in communications from Wm. R Prince. in the Patent Office Report for 1861, and in the "Horticulturist." The latter can be obtained by applying to P. B. Mead, 37 Park Row New York, price 18 cts. per number, or $2 per year.

Descriptions of the majority of them will also be found in our previous Strawberry Catalogues.

The Collection has been carefully selected from the entire mass that has been brought to notice in this Country and in Europe, and all the others have been rejected except a few that are under probation. We still retain a few secondary varieties, which being popular, are often demanded by those who are not yet familiar with the Superior Kinds. Of the following assortment, [redacted] the most splendid varieties, designated by an asterisk (*), were originated in our own Nurseries, and selected from thousands of seedlings during the past twenty years, and several varieties are now offered for sale for the first time. These *American Varieties* possess the advantage of great hardihood and productiveness and are suitable for field culture.

H denotes Hermaphrodites, P Pistillates

Assortments We will supply any assortments of $5 or $10, or more, as offered by others, and will *add 10 pr. cent thereto in plants gratis:* but Purchasers can make much better selections from our more ample collection than those offered by others We will of course include the Triumph de Gand if desired, but we cannot recommend it highly as we have far superior and more productive varieties. This kind has been unduly puffed, as it does not produce more than half the crop that most Pistillate varieties do, is inferior in flavor to many other European varieties of the Pine family, and has been rejected there.

Grapes, Raspberries, Currants, Gooseberries, and Cranberries at low rates.

North American Varieties.

110½	White Pineapple, H. (new large.)			

English, French and Belgian Strawberries.

These are all of the Pine family, [up to No. 197] and the most of them are of Belgian origin, and of a more hardy character than the English Varieties, which have been heretofore introduced and discarded. They produce large and beautiful berries, mostly with white flesh, and are remarkable for their sweetness, exquisite flavor and perfume, with a few exceptions Being of Tropical parentage, they require a warm [illegible]on, a strong, rich soil, and to be cultivated in rows or stools and kept free from runners. All are Hermaphrodites, but the Staminate Male should accompany them in the proportion of one to ten Hermaphrodites.

☞ Varieties marked thus, (†) will not be for sale until August. All others can be supplied immediately.

121 †Ambrosia, [Nicholson]
122 †Auguste Rietmeyer, [Jonghe]
Admiral Dundas, poor flavor, Rejected.
